

# What Is Home Visiting?

Early childhood home visiting with Parenting Communities is a direct service to families with children from ages birth to age 6. Home visits are completely voluntary.

Things home visitors can help with:

- information on child development
- providing age-appropriate activities
- conduct developmental screenings
- share stress reduction strategies
- discovering new ways to understand behaviors
- support families with the complexities of raising a family
- create shared experiences with children that help prepare them for their lifelong journey of learning
- reflecting upon family life, parenting, the child(ren), and relationships in a safe, non-judgmental way
- connect families with other families in the community
- find access to resources in the community
- **TO HELP PARENTS BE THE PARENTS WE DREAM OF BEING**
